Wrocław University of Science and Technology

Today's Wrocław University of Science and Technology is the heir to the material legacy of the German Königliche Technische Hochschule Breslau and the intellectual and research traditions of the Lviv University of Technology.

The university is using its current name since 1945.

It was established and organised by scientists from Lviv and Warsaw. Since the very beginning of its existence, it has been an important centre of technical education.

Today it is one the best technical universities in Poland

– 23 850 students study here under the guidance of 2 287 academic teachers, at 14 Faculties in Wrocław and 3 branches in Jelenia Gora, Legnica, Walbrzych.

Wrocław
University
of Science
and Technology

Mission

Wrocław University of Science and Technology (Wrocław Tech) is an autonomous university, a research institution of a university type. Its mission is to shape creative, critical and tolerant personalities of students and PhD students, also to set directions for the development of science and technology.

The university carries out its public mission through invention and innovation, sharing knowledge, keeping the highest scientific research standards and quality of education, combine with the freedom of criticism and respect for the truth.

As an academic community, Wrocław University of Science and Technology, cherishes academic values and traditions, versatile cooperation with other universities and strives to secure a prominent position among European and world universities.

EDUCATION

Fields

Wrocław University of Science and Technology conducts research in the following fields of engineering and technical, exact and natural, social sciences and medical and health sciences:

- Architecture and Urban Planning
- Automation, Electronics, Electrical Engineering and Space Technologies
- Information and Communication Technology
- Biomedical Engineering
- Chemical Engineering
- Civil Engineering, Geodesy and Transport
- Mechanical Engineering
- Materials Engineering
- Environmental Engineering, Mining and Energy
- Medical Sciences
- Mathematics
- Chemical Sciences
- Physical Sciences
- Management and Quality Studies

Faculties

- Faculty of Architecture
- Faculty of Civil Engineering
- Faculty of Chemistry
- Faculty of Information and Communication Technology
- Faculty of Electrical Engineering
- Faculty of Geoengineering, Mining and Geology
- Faculty of Environmental Engineering
- Faculty of Management
- Faculty of Mechanical and Power Engineering
- Faculty of Mechanical Engineering
- Faculty of Fundamental Problems of Technology
- Faculty of Electronics, Photonics and Microsystems
- Faculty of Pure and Applied Mathematics
- Faculty of Medicine
- Wrocław Tech Branch in Jelenia Góra
- Wrocław Tech Branch in Wałbrzych
- Wrocław Tech Branch in Legnica

Since its very beginnings, WUST has aimed to deliver high quality education. Its multidisciplinary character goes beyond the traditional fields of engineering, interweaving technical, mathematical, natural and economic sciences with humanities.

Doctoral school

The Wrocław University of Science and Technology Doctoral School began its operation on October 1, 2019. Candidates can take up education in one of thirteen disciplines:

Field of engineering and technical sciences

- Architecture and Urban Planning
- Automation, Electronics, Electrical Engineering and Space Technologies
- Information and Communication Technology
- Biomedical Engineering
- Chemical Engineering
- Civil Engineering, Geodesy and Transport
- Mechanical Engineering
- Materials Engineering
- Environmental Engineering, Mining and Energy

Field of exact and natural sciences

- Mathematics
- Chemical Sciences
- Physical Sciences

Field of social sciences

- Management and Quality Studies

Education quality and accreditation

European Chemistry Thematic Network

- Chemistry Doctorate Eurolabel Certification for studies in Chemical Engineering
- Eurobachelor Certification for studies in Chemistry and Industrial Analytics, Chemical Technology
- Euromaster Certification for studies in Chemistry and Chemical Technology

Science Evaluation Committee (KEN) discipline assessment 2017-2021:

Category A+:

- Physical sciences
- Chemical sciences
- Mathematics
- Chemical engineering

Category A:

- Architecture and urban planning
- Automation, electronics and electrical engineering
- Technical informatics and telecommunications
- Biomedical engineering
- Civil engineering and transportation
- Mechanical engineering
- Material Engineering
- Environmental engineering, mining and energy
- Management and Quality Sciences

European Consortium for Mathematics in Industry

- accreditation for II degree of education studies in Applied Mathematics

Accreditation of Studies with a Future 2021

- Management of first-cycle studies

European Accreditation of Engineering Programmes

- accreditation for studies in Electrotechnics
- accreditation for studies in Civil Engineering
- accreditation for Biotechnology, Chemical and Process Engineering, Chemical Technology

European University Association (EUA-IEP)

- accreditation for Wrocław University of Science and Technology

Association of Academic Centers for Teaching Foreign Languages (SERMO)

- Foreign Language Center of Wrocław University of Science and Technology - distinctive grade

HR Excellence in Research

In June 2016 European Commission granted our University the logo "Human Resources Excellence in Research". The logo is given to those institutions that apply the principles of the European Charter for Researchers and the Code of Conduct for the Recruitment of Researchers.

Logo "HR Excellence in Research" is awarded, among others, in international grant competitions of the European Commission, national grant competitions of the National Center for Science and the National Centre for Research and Development and competitions and funding programs of the Ministry of Science and Higher Education.

Logo "HR Excellence in Research" emphasises the Wrocław University of Science and Technology importance as an institution which creates the best working conditions for scientists, implementing research and scientific development in accordance with the European standards.

HR EXCELLENCE IN RESEARCH

University Network for Innovation, Technology and Engineering

In September 2022 Wrocław University of Science and Technology joined the prestigious European network of universities. The aim of this elite organization, uniting universities from nine EU countries, is to create a model of education that responds to the challenges of the modern world.

Unite! network was established in 2019 thanks to the initiative of the European Commission, assuming the creation of a European Education Zone by 2025. Currently in part of Unite! nine leading European universities enter. WUST is the first to represent in Unite! eastern part of the Old Continent.

The member universities focus on continuous improvement of the teaching process, development of joint research projects and a flexible study path, and combining science and humanities in the process of educating students.

INTERNATIONAL COOPERATION

Current international agreements

- **Bilateral cooperation agreements** - inter-university and inter-faculty
208 partners from **45** countries
- **Bilateral student exchange agreements** (student exchange)
45 partners from **17** countries
- **Double diploma agreements**
12 partners from **4** countries
- **Agreements regarding academic mobility in the Erasmus + program**
650 active European agreements and 32 with partners from other countries of the world.

INTERNATIONALISATION	2022/2023

WROCLAW UNIVERSITY OF SCIENCE AND TECHNOLOGY FOR THE YOUTH

Wrocław University of Science and Technology for the youth

- Open days
- Team programming contests
- Competition in maths and logic games
- Chemistry contest
- Young Researchers Academy
- Courses for candidates
- Cooperation with secondary schools
- Lower Silesian Festival of Science
- *Polilab*
- *Studium talent*

Student activities

- **185 Scientific organizations**

Among others: PIRM Mobile Vehicles and Robots Scientific Circle, Students Scientific Society KoNaR, Academic Aviation Club, Bio-Top, ALLIN, Wireless Group, PWR Solar Boat Team, LabVIEW Fan Group, KN Robocik, PWR Racing Team.

- **29 Student associations**

Among students' organizations, the ones with national or international span are the most distinguishing and active: BEST Wrocław, AIESEC, NZS, IAESTE, SEP, Erasmus Student Network ESN.

- **21 Student culture centres**

Among others: POLITECHNIKA Film Discussion Club, Wrocław University of Science and Technology Academic Choir, BIG BAND music group, FOSA Academic Filmmakers Club, SpAF Association of Para-artistic Photography, University's Orchestra, STYK Students Television.

Modern University

Prospective students:

- on-line registration at: rekrutacja.pwr.edu.pl/en
 - official website: pwr.edu.pl
-

Students:

- electronic student ID
 - electronic student record book
 - cooperation with companies and institutions, opportunities for internships and trainings
-

Teaching:

- studying in foreign languages

Wrocław
University
of Science
and Technology

SCIENCE AND RESEARCH

Research

Scientific research results

- **22 534** publications in journals on the ISI Master Journal List
- **20 606** publications in JCRI indexed journals
- **6 162** registered inventions, including utility models
- **2 763** patents obtained

Commercialisation of research results:

- hundreds of original technical solutions, research and technology methods used in industry
- numerous license agreements to use inventions

Cooperation with industry

TRAINING

RESEARCH

TECHNOLOGY

EXPERTISE

APPLICATION

Goals

- joint research and implementation work in various industry sectors
- development of new technologies
- teaching and engineering staff; upgrading their professional skills
- cooperation on using research, teaching and training facilities
- opportunities for internships, student stays and diploma theses
- alumni career support
- development of academic entrepreneurship
- commercialization of research results
- preparation and implementation of projects financed from domestic and foreign funding
- promotion of modern technologies

Certified laboratories

- Accredited Laboratory of **Standards and Metrology of the Electromagnetic Field** (research and calibration laboratory),
- Accredited **Acoustics** Testing Laboratory,
- Accredited **Reverse Engineering** Laboratory,
- Accredited **Belt Transport** Laboratory,
- Accredited **Work Safety** Laboratory,
- Accredited Testing Laboratory for **Transport Infrastructure Facilities**,
- Accredited Laboratory for **Electromagnetic Compatibility**,
- Accredited Laboratory of the **Department of Machine Design and Testing**,
- Accredited **Chemical Laboratory for Multi-element Analyzes**.

The Wrocław University of Science and Technology Congress Centre

The Congress Centre comprises three conference halls with a total capacity of 620 seats. The centre can be divided into modules in a theatre-style arrangement, in the following ways: one hall with 620 seats, one hall with 320 seats, one hall with 300 seats, hall with 460 seats, 2 halls with 160 seats each.

- 3 conference hall+ 3 smaller seminar rooms
- Professional equipment, including a system for simultaneous translations
- Sound recording of the conference
- Wireless internet
- Variable lighting system
- Exhibition complex
- Professional event service

Third generation

Third Generation Universities are the idea of a modern university which, in addition to teaching and research, also implements research results into the economy. These types of universities have developed technology transfer centers, business incubators and are conducive to the creation of specialized research groups, where English is the basic language of work.

Main goals of Wrocław University of Science and Technology as the Third Generation University:

- education
- research
- commercialization of knowledge
- cooperation with the region and the city.

Strategy of Wrocław University of Science and Technology 2023-2030

Mission

- Through research, teaching, and collaboration we inspire and support the development of individuals who, based on knowledge, ethical standards and displaying sensitivity to the needs of society and global challenges, shape the future with courage and responsibility.

Vision

- Vision As a European comprehensive technical university affirming freedom, truth, curiosity, and joy of science, we conduct interdisciplinary education and research in response to the aspirations and challenges of the society and economy.

Values

- Excellence – in education, research and knowledge transfer, and in personal development of our community members.
- Collaboration – understood as combining individual talents to achieve common goals, mutual support in achieving individual goals, and the University's cooperation with its environment.
- Openness – to new ideas and challenges and in relation to University community members.
